New Approaches to the History of Political Thought: Mirrors for Princes Reconsidered

## Conference Program

The history of political thought is often conceived as a genealogy of modern political concepts, debates, and institutions. This approach, however, neglects a substantial portion of medieval and early modern political writing, one subset of which is the genre commonly known as "mirrors for princes" or "advice for rulers." Reconsidering this literature could address important questions in the field of political thought through engagement with non-western traditions, as well as those European strands of thought that have not been recognized by modern historians as necessarily influential in shaping modern European political thought.

The papers presented at this conference will conduct

a close reading of some fundamental aspects of the mirrors for princes genre in the medieval and early modern periods, as well as address connections (or discontinuities) with recent methodological innovations in the historical study of political thought.

| -9:30         | REGULA FORSTER (Freie Universität Berlin) and NEGUIN YAVARI (The New School, New York),   | Section 4: Travelling Mirro |   |
